Ellis, William Hodgson [Professor of applied chemistry and toxology] Oct 1917-June 1918

Board

University of Toronto
TORONTO, CANADA

25

FACULTY OF APPLIED SCIENCE AND ENGINEERING

Oct. 1st, 1917

The President,

University of Toronto.

Dear Sir Robert:-

You are aware that Mr. R. J. Marshall took last session Prof. T. R. Loudon's work in Ferro Metallurgy. Mr. Marshall was then Demonstrator in Applied Mechanics. This year the position of Demonstrator in Applied Mechanics has not been filled and Mr. Marshall was therefore not appointed. He has, however, offered to give the lectures in Ferro Metallurgy without remuneration as Prof. Loudon is absent on active service. I would advise that Mr. Marshall's offer be accepted.

Yours faithfully,

W T Ellis

Dean

Ellis, William Hodgson
Professor of applied chemistry and toxicology
Oct 1917-June 1918

University of Toronto

27

FACULTY OF APPLIED SCIENCE AND ENGINEERING

Oct. 16th, 1917

The President,

University of Toronto.

Dear Mr. President:-

Mr. L. J. Rogers was Demonstrator last year. In this year's Estimates there is provision for a Lecturer, formerly Demonstrator. I beg to recommend that Mr. Rogers be accordingly appointed Lecturer in Analytical Chemistry.

Yours very truly,

W H Ellis

Dean

October 27th, 1917

Dean W. H. Ellis,

Faculty of Applied Science.

Dear Dr. Ellis:

At a meeting of the Board yesterday my recommendation that Miss MacMechan should be authorised to give lectures in German without increase of present salary was agreed by the Board.

Yours sincerely,

President.

26

November 9th, 1917

Dean Ellis,

Faculty of Applied Science.

Dear Dean Ellis:

In reply to your letter with regard to Mr. P. J. Marshall I am glad to authorize the acceptance of lectures to be given by Mr. Marshall without remuneration for Professor T. R. Loudon in the department of Ferro-Metallurgy.

Yours sincerely,

President.

Ellis, W Hodgson

December 15th, 1917

The Dean of the Faculty of Applied Science,

University of Toronto.

Dear Sir:

The Board of Governors has appointed a Committee to consider the status of lecturers as regards their attendance and voting powers in the Faculty Councils. This committee before taking any action in the matter is desirous of ascertaining the opinion of the Faculties of the University with regard to it. Would you kindly have the matter brought to the attention of the Faculty of Applied Science at an early date ? I may state that the Council of the Faculty of Arts has already taken action.

I am,

Yours sincerely,

President.

10

May 24th, 1918

Dean Ellis,

University of Toronto.

Dear Dean Ellis:

Dr. Kennard Thomson is very anxious that some way or other the name of Mr. W. F. Tye should be placed upon the roll of the Faculty of Applied Science. I do not see how this is to be done. Prehaps some way may occur to you.

With kind regards, I am,

Yours sincerely,

President.

University of Toronto

FACULTY OF APPLIED SCIENCE AND ENGINEERING

8

May 30th, 1918

Sir Robert Falconer,

President,

University of Toronto.

Dear Sir Robert:-

Mr. W. F. Tye has done, I believe, excellent work and would be a credit to the University if his name were upon our roll. His case appears to be something like that of Mr. Hodgins, which you will recollect, only Mr. Tye has much greater claims to distinction than Mr. Hodgins had. As nearly all the Council are away at present I do not think that anything can be done now, but I will speak to some of my colleagues and the matter might be brought up if you thought wise when the Council meets in October.

Yours sincerely,

M Kelli

May 31st, 1911

Dean H. H. Ellis,

Mining Building.

Dear Dean Ellis:

I brought up yesterday at the meeting of the Board the question of remuneration for Miss MacMechan in German. According to the minutes of the Board the Bursar stated that when she was given the bonus it was on the understanding that she was to do German without extra remuneration. Would you be kind enough to look into the matter ?

Yours sincerely,

President.

5

June 1st, 1918

Sir Robert Falconer,
President,
University of Toronto.

Dear Sir Robert:-

The bonus which was given to Miss McMechan for the session 1916-17 was given to her for teaching the German. You told me that the Governors preferred to give the additional remuneration for the extra work outside her ordinary duties which was entailed in teaching German as a bonus rather than as an increase of salary, which might be held to be a precedent. The arrangement that I asked for and that I understood you agreed to for the session 1917-18 was the same as in the previous session, that is to say, that Miss McMechan should receive a bonus of $50.00, the remuneration for teaching the German being given in the form of a bonus and not as an increase in salary.

Yours sincerely,

M H Ellis

Got slip for
1917-18 &
for 1918-19
as Demonstrator in Chemical Engineering

June 12th, 1918

Dean R. H. Ellis,

Faculty of Applied Science and Engineering.

Dear Dr. Ellis:

I have written to this gentleman stating that there is no likelihood of his request being granted, but saying also that I have referred the matter to you.

With kind regards, I am,

Yours sincerely,

President.

6

June 13th, 1918

Dean Ellis,

Faculty of Applied Science.

Dear Dean Ellis:

The Government are being very strongly urged to remove compulsory Greek from all courses in the Schools and these would include the University also. I am taking the matter up with the Faculty of Arts. The only other department in the University as far as I am aware where there is compulsory Greek is in the Faculty of Applied Science. Would you be kind enough to consider whether it would not be possible to change the curriculum in any of the departments of Applied Science where Greek is now compulsory so that it may be only as option, or perhaps be removed from the curriculum altogether ?

I am to be away for a week, but the Senate is being called for the end of the month. Perhaps the Council of the Faculty of Applied Science might meet on June 24th to take action and recommend to the Senate. The Council of the Faculty of Arts is meeting that day at four o'clock.

With kind regards, I am,

Yours sincerely,

President.

2

June 14th, 1918

Sir Robert Falconer,

President,

University of Toronto.

Dear Sir Robert:-

I am very strongly opposed personally to removing German from courses in the School. I think I should strongly oppose in particular removing it from the course in Chemistry. I will call a meeting of the Council for the 24th of June to consider the matter and report to the Senate.

Yours sincerely,

W H Ellis
